Heat transfer, Water, Steam, Gas, Combustion,
Nuclear energy, Dielectric properties, Production.

Values are presented of the thermal energy as well as
the guiding factors which will lead to an increase of the
production of the crude from layers (reservoirs).
Discussed are the manner in which one leads such an
energy to the reservoir, namely either by a heat
convection in which a carrier of heat is used, like
(Engineering, TT, v. 11, no. 3) (over)
